DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: With respect to independent claims 3, 4 and 12, see Office Action sent on 04/07/04. With respect to claim 14, it would not been obvious to combine all the elements disclosed in the claim such as having an induction machine with a toroidally wound stator, an inverter having a plurality of switches and the inverter having the same number of phases as the toroidal induction machine and a programmable digital signal processor connected to the induction machine in which the processor uses a program to implement vector control and further controls the inverter so that the induction machine operates with a predetermined number of poles using pole phase modulation to change the number or stator and rotor poles to a plurality of pole combinations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
